

Pearlgloss

Dispersion, Oil based and UV varnishes, especially applicable for sheet-fed offset, gravure printing and flexo printing with roller and chambered ductor blade coating units wet in wet and wet on dry. Applicable on all coating machines.

Pearltec ink-varnishing systems are set up in consideration of the printing support with highest rub resistance, wet blocking resistance in connection with fastest drying and best gloss-matt development.

A high production flexibility and product safety with fastest printing speed have top priority in the Pearlgloss product development.
